

# Top 20 Advantages to Using Densifier plus Repeller

1. Provides a more abrasion- and crack-resistant surface
2. Remains resilient during movement
3. Provides increased density
4. Resists oil while repelling water
5. Enhances surface traction
6. Resists freeze-thaw damage
7. Provides easier ice removal
8. Improves fungus and mildew resistance
9. Enhances surface bonding quality
10. Eliminates or significantly retards efflorescence
11. Requires no special surface maintenance
12. Waterproofs concrete internally as well as externally
13. Makes concrete virtually impermeable
14. Reduces dusting
15. Preserves concrete's integrity
16. Improves thermal and acid/chemical resistance
17. Provides internal humidity stability and restricts vapors transmission
18. Increases strengths
19. Eliminates internal water migration
20. Lowers chemical reaction and creep deformation potential

***Densifier plus Repeller will improve your concrete inside and out. What do you have to lose, except maybe a few headaches?***
