

WHO NEEDS IT?

Anyone who's looking for a durable protective finish (clear or colored) for their concrete or other valuable surfaces.

PROTECRETE®
CONCRETE'S BEST SOLUTION

Redeemer

P R O D U C T I N F O R M A T I O N

WHAT IT DOES

PROTECRETE Redeemer is a durable, flexible membrane coating for concrete and many other surfaces, such as masonry, stone, drywall and wood. Redeemer is safe and easy to apply and provides an attractive glossy finish.

Redeemer is exceptionally long-lasting and remains resilient, even under heavy traffic. This translates to money savings to you because of less maintenance and longer times before reapplication.

Redeemer can be pigmented to hide a multitude of "sins," such as stains and discoloration.

Redeemer is excellent for crack repair and will also consolidate and waterproof the sand between pavers.

Redeemer helps external concrete resist freeze-thaw damage and also makes snow and ice removal easier.

When used in combination with PROTECRETE Densifier, Redeemer also provides excellent stain, acid and chemical resistance.

HOW IT WORKS

Redeemer needs at least 24 hours drying time. In

this time, Redeemer cures to form an extremely hard yet flexible (up to 400% elongation) membrane.

OTHER IMPORTANT THINGS YOU'LL BENEFIT FROM

Safety is another feature of Redeemer. It's safe to apply since there are no fumes (in fact, it's completely odorless) and it's completely non-toxic. This makes it perfect for projects involving food service or requiring a safe environment for children or pets.

WHAT IT IS

Redeemer is a milky white (which dries clear), non-petroleum, odorless, environmentally neutral (safe) acrylate aqueous dispersion.

HOW TO USE

Redeemer is easy to apply. Depending upon how it's being used, it can be applied using a paint roller, low-pressure non-atomizing spray unit or even with

a pointed squeeze bottle (in crack repair situations). It should be applied when ambient temperature is 55°F or higher.

PACKAGING AND AVAILABILITY

Redeemer is available from authorized distributors of Applied Concrete Technology, Inc. in 5-gallon pails and 55-gallon drums.

FLAMMABILITY

Redeemer is not combustible or flammable. It has no flash point.
